ATHIP THUMAKUL

FULL-STACK SOFTWARE ENGINEER

Node.js • TypeScript • React • Logistics Systems

Bangkok, Thailand | 094-676-5524 | atipthummakul@gmail.com

portfolio-auyatip.vercel.app | github.com/auyatip | linkedin.com/in/athip-thumakul

PROFESSIONAL SUMMARY

Backend-focused Full-Stack Software Engineer with 2.5+ years of experience building production logistics ERP and parcel-tracking platforms using TypeScript, Node.js, React, and Next.js. Experienced in REST API design, database modeling, Redis caching, background jobs, event-driven workflows, and third-party integrations. Improved parcel-tracking query performance by 40% and supported systems processing thousands of shipment updates daily.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, C, Golang

Backend: Node.js, NestJS, AdonisJS, Express, REST APIs, Webhooks, Socket.io, Ngrok

Frontend: React, Next.js, Material UI, Tailwind UI

Databases: MySQL, PostgreSQL, MongoDB, Redis

Architecture: Event-Driven Systems, Background Jobs, Caching, RBAC, System Integration

Infrastructure and Tools: Docker, AWS S3, DigitalOcean Spaces, Git, Postman, Trello

AI-Assisted Engineering: ChatGPT, Codex, Cline, and GLM for implementation planning, code review, debugging, test-case generation, technical documentation, and PR analysis

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer

February 2025 - Present

NEXT CORPORATE CO., LTD. | Bangkok, Thailand

- Develop and maintain logistics ERP modules covering order booking, warehouse operations, parcel tracking, claims, payments, commissions, and delivery workflows.
- Reduced parcel-tracking query time by 40% through API optimization, database query improvements, and Redis caching.
- Design database schemas and backend workflows for shipments, pricing, claims, payment operations, audit logging, and scheduled processes.
- Build LINE Official Account integrations for real-time chat, notifications, webhooks, customer linking, and communication workflows.
- Implemented bulk claim-payment processing supporting up to 500 records per operation.
- Develop audit and security features covering administrator activities, login history, devices, IP addresses, and browsers.
- Integrate courier providers, cloud storage, and external platforms while supporting production troubleshooting and releases.
- Use AI-assisted engineering workflows for implementation planning, code review, debugging, edge-case analysis, and technical documentation while validating generated solutions before production use.
- Collaborate with business analysts, QA engineers, and operations teams to deliver features from requirements through production.

PROFESSIONAL EXPERIENCE - CONTINUED

Software Developer
November 2023 - January 2025

TechEx Co., Ltd. | Bangkok, Thailand

- Delivered custom SaaS and logistics applications using Next.js, React, Node.js, Golang, and REST APIs.
- Designed production data models and integrations across MongoDB, PostgreSQL, MySQL, Google Maps, SMS, and email services.
- Built a multi-courier booking application and distribution-center workflows for parcel scanning, routing, and delivery operations.
- Developed admin systems for courier assignment, pricing, installment configuration, product management, advertisements, and service branches.
- Implemented member-management and e-KYC APIs for integration between web and mobile applications.
- Collaborated with system analysts, business analysts, QA engineers, and developers to deliver production features in Agile teams.

ADDITIONAL EXPERIENCE

Junior Software Developer - Bootcamp Cohort 5
July 2023 - October 2023

Generation Thailand | Bangkok, Thailand

- Completed a 15-week, full-time software development bootcamp supported by Microsoft Thailand and the Ministry of Higher Education, Science, Research and Innovation.
- Built full-stack MERN applications using React, Node.js, MongoDB, SQL, Git, and Agile practices.

Aircraft Engineer
June 2021 - July 2023

Directorate of Aeronautical Engineering, Royal Thai Air Force | Thailand

- Repaired and modified aircraft structures under regulated safety, quality, and technical documentation procedures.
- Developed strong troubleshooting, cross-functional teamwork, and operational responsibility in a safety-critical environment.

EDUCATION

Bachelor of Information and Communication Technology
2022 - June 2025

Sukhothai Thammathirat Open University | Thailand

Diploma in Aircraft Maintenance
2018 - 2021

Civil Aviation Training Center | Thailand

CERTIFICATION AND LANGUAGES

Junior Software Developer Program, Cohort 5 - Generation Thailand, 2023

English: Intermediate working proficiency | Thai: Native
